

# ETIM INTERNATIONAL

Overview about organization  
and types of membership

**ETIM**  
*International*

The non-profit association ETIM International is a partnership of national ETIM organizations and has its official seat in Brussels.

The association has the following formal bodies: The General Assembly, the Executive Board and the Technical Committee.

The **General Assembly** has full powers to achieve the objectives and to ratify the vision and strategy of ETIM International. Each country has one vote in the General Assembly, which decides by majority. The General Assembly is the highest formal body in the organization and will elect the Executive Board to perform operational tasks, it can also set up policy groups and working groups. So ETIM International shall be governed by an **Executive Board** in accordance with decisions reached by the General Assembly.

The **ETIM Technical Committee (TC)** is the central body for all decisions regarding the standardization process. It has a technical supervision over the complete ETIM model. The TC will formally decide on all proposed RFCs (accept, rework, reject) by using the CMT. Each member country designates one person as a member of the TC, who is regarded as an ETIM technical expert. If necessary, the TC works together with other relevant institutions and initiatives.

The Executive Board is composed of 5 persons, including the President and the Vice-President (“Executive Board members”). Board members are elected by the General Assembly for a term of three years and are re-electable for a new term.

## The current composition of the ETIM International board is:

### President

Franz Ernst (ETIM Germany)

### Vice-president

Ryszard D’Antoni (ETIM Poland)

### Treasurer

Eric Piers (ETIM Belgium)

### General board members

Sverker Skoglund (ETIM Sweden)

### Chairman Technical Committee

Marc Habets (ETIM Netherlands)

VAT number: BE0817144430

ETIM International is an association that is intended as a partnership of local ETIM organizations in different countries. Full membership of ETIM International is open to recognized national ETIM organizations as specified in the present statutes. Also ETIM International can accept supporting members without voting rights.

**So individual companies such as manufacturers, wholesalers or technical contractors are not a direct full member of ETIM International, but indirect through membership in one or more of the local ETIM organizations.** In exceptional cases, where a recognized national ETIM organization does not yet exist in a country, a limited number of individual companies can be accepted temporarily as a direct member under the conditions described in the statutes.

The organization of the national ETIM organizations is not centrally defined. However some guidelines are given by the statutes to the activities to be performed by the national organizations.

## ETIM Austria

ETIM is represented in Austria by the association ETIM Österreich.

### Type of organization

society to the Austrian law

### Type of membership

full membership for companies  
supporting membership for federations, software companies etc.
